ATS is currently looking for qualified candidates for a Welding Engineering position. They will be responsible for ensuring that small projects or sub-scopes of large projects are executed in accordance with contractual obligations meeting technical and quality contract deliverables, and applying safety requirements per ATS Safety Procedure, within planned budget and schedule constraints. To perform this job successfully, an individual must be able to perform each essential duty satisfactorily. The requirements listed below are representative of the education, knowledge, skill, and/or ability required.

**EDUCATION/SKILLS:**

- BS Degree in Engineering; Welding Engineering preferred, Welding Engineering Technology or Materials Science, Metallurgy, Mechanical, with experience related to welding acceptable.
- must have successfully passed the NCEES FE Exam or have plans to take it within a year of graduation.
- industrial experience in Engineering, related to welding fabrication a plus.
- working knowledge of applicable design Codes and Standards (AWS, ASME, API, ANSI, etc.)
- working knowledge with most Microsoft Office products (Word, Excel, Outlook, Project, Adobe, etc)
- a self-starter, able to complete tasks with a minimum of guidance/supervision.
- must be detail oriented, organized, and able to multi-task.
- interpersonal and communications skills, both verbal and written, in the English language
- assign priorities and resolve conflicts within daily routine tasks.
- ability to work as a TEAM player.
- ability to travel required.

**RESPONSIBILITIES:**

- develop and qualify welding techniques per applicable code/specification; write welding procedures and submit procedures to customer or for internal use.
- assist team members in the development of work scopes, schedules, project costs, and identify the source of technical resources.
- perform other tasks as assigned or requested by Engineering Manager, Top Management or assigned team mentor, including the ability to participate in the execution of contracted projects.
- interface with customers to determine Work Scopes for potential projects.
- manage interfaces with customers, Engineering, and Inspection personnel as well as shop employees.
- manage project budget, schedule, and coordinate activities to ensure project completion within budget and contracted schedule.
• identify required subcontract activities, i.e., machining, NDE, DT, and coordinate scheduling as necessary.

• prepare detailed fabrication record reports for submittal to customers upon completion of project.

Physical Requirements:
